

## Downloading the PureEdge Viewer for Mac

**First, check your Mac for compatibility.** With all applications closed or minimized, select <About this Mac> from the Apple Menu in the upper left hand corner of the menu bar. An information window will appear, and will look something like this:

- If your OS X version is below 10.4.6, click <Software Update> to get the latest version, which is 10.4.8. The Viewer will not work on any version lower than 10.4.6.
- Take note of which processor you have, PowerPC or Intel.

### **IBM Workplace Forms (PureEdge) Viewer for Macintosh**

IBM has provided Special Edition Mac Viewers for PPC and Intel that are now available for download. You may wish to use this software if you do not have access to a Windows machine, Windows emulation software, or the Citrix server. Please note that limitations of this early release software may include:

- Occasional crashes and subsequent loss of any unsaved data
- Inability to run on Mac OS version prior to 10.4.6
- No current support for screen readers for visually impaired users
- The viewer is installed at the root level of the user account home directory. (e.g. /Users/jsmith/). Do not move the application folder to any other location as it will not work.

Please consider these limitations and warnings and also read the release notes carefully before using this software. We will provide additional information on commercial releases of this product as they become available.
